

Abhishek Jain

Senior Data Scientist

Ph: 9560579902, Email: abhishekdm4@gmail.com

LinkedIn: <https://www.linkedin.com/in/abhishekdm4/>

Website: <https://abhishekdm4.github.io/>

Summary:

Data Scientist with 8 years of experience, I excel at converting complex datasets into strategic insights that drive business value. My technical proficiency encompasses the complete data lifecycle, including data mining, visualisation and model learning model development. Having worked with Senior Product Managers and Digital Marketers withing Retail, E-commerce, CPG, Logistics, Manufacturing domains has helped me garner skills like strategic thinking and problem solving. I am a strong communicator, able to bridge the gap between technical teams and non-technical stakeholders, ensuring alignment and effective decision making.

Professional Summary:

Amazon

Senior Data Scientist – Hub Pickup And Return Points | Last Mile Analytics

Jan 2024 - Present

- Developed and deployed Topology Tool using **XGBoost based Demand Forecast and Optimisation models**, that drives all new pickup location decision across US and EU5. Achieved **accuracy (R2 score) of ~90%** and drove **~\$60M in CapEx investments** in 2025 while maintaining throughput guardrails.
- Productionized a **text classification framework using BERT** for ~150k/month SDS contacts and 10+ feedback responses, achieving **82% ROC** on a 12-level taxonomy to surface PARP delivery defects. Scaled the methodology to 5+ delivery streams, including Hub, DSP and Flex drivers.
- Designed a self-serve Text-to-SQL platform leveraging **GenAI and RAG** enabled knowledge base to translate natural language into complex customer targeting queries. Achieved **~95% execution accuracy** and **reduced work load by 75%**.
- Analyzed 12M customer interaction and transaction records to test hypothesis around engagement decay, behavior volatility and churn driven by negative experience. **Engineered 150+** recency, frequency, concession and stability features to build explainable **Logistic Regression, LightGBM models**, achieving early churn risk detection with a **recall of 85%**. Applied **SHAP** based explainability to ensure transparent and ethical model behavior.
- Designed **A/B tests on the Amazon Checkout Page** for Locker Delivery, comparing 3 treatment variants against control, identifying the most effective checkout experience and increasing locker adoption by **8%**.
- Collaborated with Marketing director to re-engage customers lost due to locker decommissions. Built a self-serve tool to find the nearest alternative pickup points, driving **67% customer retention** across 20 decommission events in EU and FE regions.

TheMathCompany

Senior Data Scientist – Manufacturing

Jun 2021 - Dec 2023

- Implemented modular **Time Series forecasting** framework in Databricks with integrated Feature Store. Forecasted hierarchical demand across region, marketplace, product group, brand, SKU level using ARIMA, VAR, ETS models. Reduced **experimentation runtime by ~80%** and enabled rapid comparison across statical and ML models.
- Deployed tire quality prediction and process optimisation simulation tool using **Catboost and Streamlit**. Empowered business users to simulate machine levers causing reduction in defect rate. **Drove 4M EUR annual savings**.
- Built analytics solution for sealant compound application using high frequency laser sensor data, applying **FFT and convolution matrix reduction techniques** to detect anomalies. Improved **operational efficiency by ~97%**.
- Created commodity price forecasting and decision support tool to **predict natural rubber prices using macro-economic indicators**, supporting hedging strategies. Augmented forecasts with NLP based **text summarisation and sentiment scoring** of recent and relevant market news.

Wipro

Business Analyst – US Benefits and Healthcare claims

Nov 2019 - Jun 2021

- Built end to end rolling 13 moths workflow health dashboard in Tableau. Involved data ingestion, metric development and deployment. Tracking 350+ metrics across 10+ operational domains.
- Led the automation of reporting workflows using Alteryx, reduced manual reporting efforts by 40%. Expanded the automation to 20+ in-house teams.
- Developed VBA based quality management tool with version control, increasing automated quality checks by 74%.

Nurtr

Data Analyst

Sep 2018– Oct 2019

- Developed lead classification Machine Learning model** to predict hot and cold leads, increasing conversion rates from ~40% to ~70%.

- Implemented lightweight CRM solution to support sales and business development teams, leading to 20% boost in product upsell.
- Delivered executive level dashboard and insights on GMV, revenue and collections to support sales target tracking and planning.

Skills:

- **Programming:** Python, SQL, R
- **Machine Learning & Stats:** Supervised & Unsupervised Learning, XGBoost, CatBoost, Random Forests, Decision Trees, Logistic/Linear Regression (Ridge, Lasso, Elastic Net), K-Means & Hierarchical Clustering, Dimensionality Reduction (PCA), A/B Testing, Time Series Forecasting (ARIMA, SARIMA, SARIMAX, VAR)
- **Deep Learning & NLP:** PyTorch, Neural Networks (CNN, RNN, LSTM, GRU), Transfer Learning, Natural Language Processing (NLP), Anomaly Detection
- **Generative AI & LLMs:** Transformer Models (LLaMA, Mistral, BERT, ViT), RAG (Retrieval-Augmented Generation), PEFT/LoRA Fine-tuning, Model Quantization (FP32 to 8/4-bit), Hugging Face, LangChain, vLLM, Prompt Engineering
- **MLOps & Data Engineering:** Databricks, Flask, Vector Databases (Pinecone, Milvus), Git, Docker, CI/CD
- **Cloud & Visualization:** AWS, Azure, Tableau, Power BI, QuickSight, Data Studio, Excel

Awards and Achievements:

- Mechanism Maven Award 2024 at Amazon for building DSI Causal Inference framework.
- Appreciation Award 2022 at The Math Company for building tire quality prediction model.
- Appreciation Award 2021 at The Math Company for turning around client experience.

Education:

Course	Institution	Year	C.G.P.A./Percentage
M.S. in data science	Liverpool John Moores University	2025-2026	Expected 2026
PGD in data science	IIIT Bangalore	2020-21	3.84/4
B. Tech	AKTU	2013-17	70%
Intermediate	Greenway Modern Senior Secondary School	2011-13	84%
Matriculation	Victor Public School	2010-11	8.8/10
